APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source and in conjunction with permit No. 3528, the same land being described in both filings. The amount of water herein granted is placed at 4.06 cubic feet per second so that such amount of water may be diverted and used in the event that there is a shortage in the source described in permit No. 3528. The applicant will be required at the time of filing proof of beneficial use of water to definitely segregate the areas of land which obtain water for irrigation purposes from each source described in these two permits. A standard headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water, same to be under State regulation. The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 4.06 cubic feet per second.

Actual construction work shall begin on or before October 11, 1916.

Proof of commencement of work shall be filed before November 11, 1916.

Work must be prosecuted with reasonable diligence and be completed on or before October 11, 1918.

Application of water to beneficial use shall be made on or before

April 11, 1923. Proof of the application of water to beneficial use must be filed with State Engineer on or before May 11, 1923.

Proof of labor filed APR - 3 1917
Map filed APR 22 1918

WITNESS MY HAND AND SEAL this 11th day
of July, 1916.

Cancelled May - 27, 1931, because of failure of
applicant to comply with provisions of permit.

Geo. W. Malone State Engineer.
